Natural Wonder of Kentucky Does Not Draw Patronage It Deserves Under Private Management.

Maramoth Cave should be made a Rossville, Ga.-Mrz. Kate Lee Able, of national park. Now is a good time to take the necessary action. The to acquire the property, upon reasonable terms. The management of the cave, asserts the Louisville Courgost that an adequate hotel will not He became constipated and it looked | be built at once, if at all, but even if doctors, yet with all their medicine, his the estate to replace the hotel that cave as a private property is a history of failure to induce the number of visitors which the importance and interest of the natural wonder warrant. As a national park, improved by good roads, provided with a good hotel, Mammoth Cave would be seen by ten times as many persons as see it under present conditions.

The area surrounding Mammoth Cave is well forested, picturesque, well supplied with streams and in every way suitable as a national park. Kentuckians should urge their representatives in congress to interest themselves in securing a sufficient appropriation to acquire the cave and enough ground around it to make a reserve representative of an exceptionally fine section scenically considered and now almost as primitive as it was when Mammoth Cave was discovered.

LIKE FATHER, LIKE DAUGHTER

in Wales' Management.

One of the most remarkable women of the day is the daughter of a redirector of national service for Wales, says London Answers, is the daughter of the food controller, the great Welsh coal operator, Lord ures of Mr. Lloyd-George's "busines government."

"Like father, like daughter" is true in this case, for Lady Mackworth is a director of more than a score of big businesses, and actually chairman of several. She certainly proves that women are not devoid of business acumen, as some would argue, and that they are capable of doing big things in the business world.

With her, business, like charity, begins at home, and it was in connection with her father's great business concerns that she first learned the ropes and got to know her way about the intricate channels of business life.

ROMANCE OF THE METALS.

Perhaps when peace comes some studious person will give us a romance of metals and the part they have played in the war. Among the newer kind, recites the London Chronicle, none is figuring more promiently in the production of munitions than aluminum. Prof. T. Turner of the metallurgical department of the University of Birmingham tells us that the output of a single foundry in the Midlands today-and there are many such foundries-is equal to that of the whole world 12 years ago. It is recorded that a baby's rattle was the first article to be made of aluminum. This was in 1856, and was intended for the infant prince imperial of France.

RAISED A QUESTION.

In his distress a needy man borrowed \$25 from a wealthy acquaintance. The same day he was discovered by his creditor in a restaurant eating a dish of salmon with mayonnaise. The creditor reproached him in these words: "You borrow money from me and then order salmon with mayonnaise. Is that what you needed the money for?" "I don't understand you," responded the debtor. "When I have no money I can't est salmon with mayonnaise. When I have money I mustn't eat it. Well, then, when shall I ever est salmon with mayonnaise?"

PEANUTS COMPLETE RATION.

As human food the roasted peanut is said, by a food expert, to be an almost complete ration, while peanut oil is now one of the dependable sources for the vegetable oils that are compensating for the growing short-age of animal fats. Cottonseed oil has already become a favorite shortening in the American kitchen, and much of the so-called olive oil we use squeezed from the peanut.
